

HealthStore™

BridgeHead's HealthStore™ is an independent clinical repository that helps organizations consolidate, protect and share healthcare information.

Benefits

Reduce Your Security and Legal Risks

Retire vulnerable legacy solutions that pose a higher risk for security threats and data loss. With HealthStore, you can develop a centralized strategy leveraging a secure, modern platform to help preserve valuable data and mitigate risks.

Manage All Your Medical Images

Provide a single view for all your patient imaging data from radiology, cardiology, the emergency department (ED), ophthalmology, dermatology and any other discipline with medical images, to build independence into your enterprise imaging strategy.

Provide Better Continuity of Care

Remove data silos by consolidating your patient information and making it easily available to clinicians as part of a 360-degree view of a patient's full medical history.

Improve Your Clinical Workflow

Reduce the need to log into multiple systems to access the complete patient history. With HealthStore you can access records directly from within your EMR.

Eliminate/Retire Costly Legacy Applications

Eliminate the costly license and maintenance fees of legacy systems and free up your IT resources to focus on more mission critical projects for your organization.

"We knew BridgeHead could assist us with our immediate imaging data needs in a cost effective way. However, BridgeHead was also able to help and guide us to take a long-term, strategic view – ensuring we store and manage other healthcare data in the future as we transition to a fully electronic patient record."

CLARE JONES, Radiology IT Systems Manager, Gateshead Health NHS Foundation Trust

KEY FEATURES

- ▶ Intuitive user interface
- ▶ Easy web access or accessible directly through the EMR
- ▶ Supports unstructured, DICOM, HL7 & XDS data types
- ▶ Store, view, analyze and export discrete data types
- ▶ User security [LDAP]
- ▶ Full DICOM image viewer
- ▶ Multi-data point search
- ▶ Bulk print
- ▶ Audit trails/logs
- ▶ Data encryption
- ▶ On-site or Cloud deployment

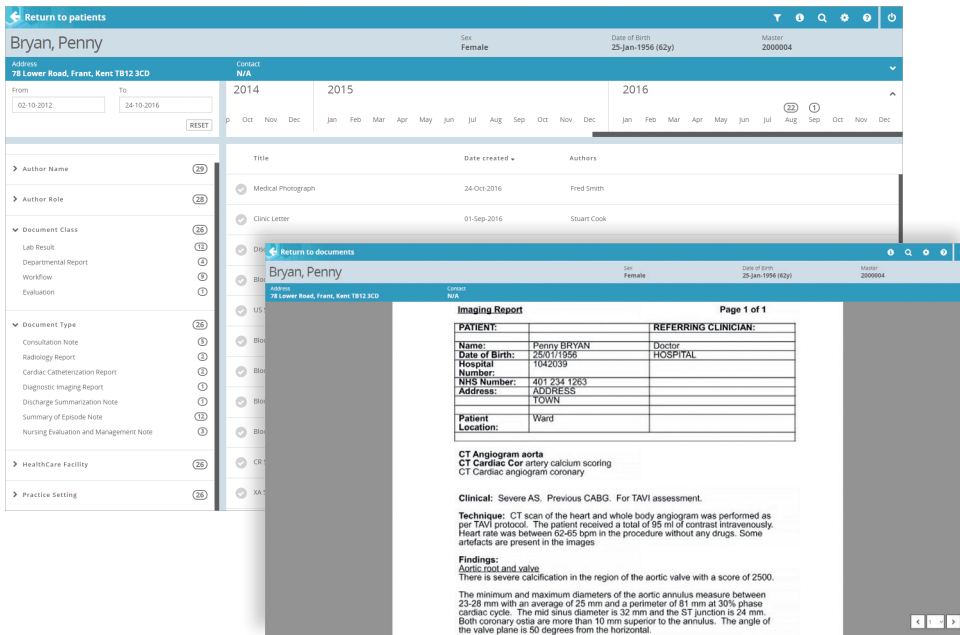

Figure 1 - HealthStore is intuitive allowing clinicians to quickly and easily find information without the need for training.

HealthStore in the Cloud

HealthStore in the Cloud takes the strain off your IT organization and provides a flexible and scalable environment for all your archiving needs. Our global Cloud solution runs within the secure Microsoft Azure environment and is proactively monitored 24/7/365 to guard against the latest security threats and provide optimal performance. Our Cloud solution helps set the stage for more robust reporting and better analytics of your valuable healthcare information.

Our Engagement Process

Our team of experts can work with you to determine what and how best to archive and consolidate your data. Whether it's medical images, patient medical records, financial statements or human resource information, we can help recommend a strategy that's right for your organization.
